1. Overview of UMVA License

UMVA License delivers authentic software licenses from original servers at wholesale prices. Whether you need cPanel for your hosting business, LiteSpeed for faster websites, or CloudLinux for resource isolation — we provide instant activation, no setup fees, unlimited IP changes, and full access to the latest features. No long-term contracts, no hidden costs, just reliable licensing for your infrastructure.

UMVA License is part of the UMVA ecosystem — a digital business platform also offering web hosting, domain registration, SMS & WhatsApp API, email servers, virtual cards, and more — all from one account.

Key Features

- Unlimited IP Changes — Change your server IP as often as needed. No restrictions, no extra fees. Full flexibility for your infrastructure.
- No Setup Fees — Zero one-time setup charges on any license. Pay only your monthly subscription.
- Instant Activation — Fully automated delivery. Your license is deployed within seconds of payment confirmation.
- From Original Server — All licenses sourced directly from original vendors. Fully authentic with real-time updates and features.
- Auto-Renewal & Updates — Licenses auto-renew and receive real-time updates from vendor servers.
- 7-Day Money-Back Guarantee — Full refund within 7 days of purchase. No questions asked.
- 24/7 Expert Support — Available around the clock via ticket and live chat. Average response under 10 minutes.

2. Why Choose UMVA License

Unlimited IP Changes

Unlike competitors who charge \$1 per IP change after the first few free ones, UMVA License offers unlimited IP changes completely free. Switch servers, migrate, or scale without restrictions.

No Setup Fees

Many providers charge \$1-2 setup fees per license. UMVA believes in transparent pricing — what you see monthly is what you pay. No hidden one-time charges, ever.

Instant Automated Delivery

Our intelligent license system activates your subscription instantly. No manual processing, no waiting for support to approve — just an automated, seamless experience.

From Original Server

All licenses are supplied from original vendor license servers — fully authentic, with real-time updates, security patches, and full access to all features. No modified files.

Bundle Discounts

Save more with curated bundles — combine control panels with security tools and auto-installers at discounted prices. The more you need, the more you save.

7-Day Money-Back Guarantee

Not satisfied? Get a full refund within 7 days of purchase. No questions asked. We stand behind the quality of our licenses and service.

3. How It Works

Get your license up and running in three simple steps:

Step 1: Choose Your License

Browse our catalog and select the license you need. Compare prices, features, and add-ons.

Step 2: Pay & Get Activated Instantly

Complete your purchase securely. Our system automatically provisions your license in seconds. Receive your activation details immediately via your account dashboard.

Step 3: Install & Manage

One-command installation on your server. Manage license IP changes, renewals, and billing from your UMVA dashboard. Change IPs anytime at no cost.

4. License Catalog & Pricing

All prices are monthly subscriptions with no setup fees. All licenses include unlimited IP changes, instant activation, and auto-renewal.

4.1 Control Panels

License	Price	Highlights
cPanel (VPS)	\$4.00/mo	Unlimited accounts, full WHM, FleetSSL, Softaculous & JetBackup included
cPanel (Dedicated)	\$5.00/mo	Same as VPS + optimized for bare metal, higher resource limits
DirectAdmin	\$2.00/mo	Lightweight, unlimited domains, runs on 512MB RAM, Let's Encrypt
DA Reseller	\$2.00/mo	Alpha/Master reseller access for agencies
Plesk (VPS)	\$3.00/mo	WebHost Edition, WP Toolkit, Docker, Git, SEO tools
Plesk (Dedicated)	\$4.00/mo	Same as VPS + unlimited cores for bare metal servers

4.2 Web Server & OS

License	Price	Highlights
LiteSpeed (2 Core)	\$4.00/mo	Drop-in Apache replacement, 10x static speed, DDoS protection
LiteSpeed (4 Core)	\$6.00/mo	Same + 4 core license for medium servers
LiteSpeed (8 Core)	\$10.00/mo	Same + 8 core license for high-performance servers
LiteSpeed (XCore)	\$12.00/mo	Unlimited cores for enterprise servers
CloudLinux	\$5.00/mo	LVE isolation, CageFS, PHP Selector, MySQL Governor
CloudLinux Pro	\$6.50/mo	Standard + KernelCare, Accelerated Sites, DB Governor

4.3 Security & Backup

License	Price	Highlights
Imunify360	\$2.50/mo	AI-powered security, WAF, malware scanner, DDoS protection, patch mgmt
CXS	\$3.00/mo	ConfigServer eXploit Scanner, malware detection, real-time monitoring
OSM Manager	\$2.00/mo	Advanced server security, real-time scanning, mod_security
JetBackup	\$2.00/mo	Incremental backups, multi-destination (S3, Google, Wasabi), 1-click restore

4.4 Billing & Automation

License	Price	Highlights
WHMCS	\$2.00/mo	Billing automation, client management, support tickets, unlimited clients
Softaculous	\$2.00/mo	450+ apps, 1-click installs, auto-updates, staging, backups
SitePad	\$2.50/mo	Drag-and-drop website builder, 300+ templates, e-commerce ready

4.5 Virtualization

License	Price	Highlights
Virtualizor	\$4.00/mo	KVM/Xen/OpenVZ/LXC, unlimited VPS, WHMCS integration, REST API
WHMReseller	\$2.00/mo	Alpha/Master WHM reseller addon module

4.6 Bundles & Addons

- cPanel Bundles — Combine cPanel + security + auto-installer at discounted prices
- FleetSSL — Automated SSL management and installation
- CPNginx — Nginx reverse proxy addon for cPanel

5. License Details

5.1 cPanel License

cPanel is the world's most popular web hosting control panel. With UMVA License, you get a fully authentic cPanel & WHM license sourced directly from the original vendor.

Features

- Full WHM Access — Complete WebHost Manager with root-level server administration and account creation
- Unlimited Accounts — Create unlimited cPanel accounts for your clients. No account limits or hidden caps.
- Real-Time Updates — Receive all cPanel updates directly from official vendor servers
- Built-in Security — Apache mod_security, CSF firewall, SSL/TLS management, 2FA support
- Database Management — Full phpMyAdmin and MySQL/MariaDB management
- Email Services — Webmail (Roundcube), spam filtering, forwarding, autoresponders
- Free Addons Included — FleetSSL, Softaculous, and JetBackup with every license

Install Commands

Main cPanel Installation:

```
bash <( curl https://umva.net/pre.sh ) cPanel; umvaCP
```

License Verification:

```
touch /etc/.verifylicense ; umvaCP
```

FleetSSL Addon:

```
umvaCP -fleetssl
```

Softaculous Addon:

```
bash <( curl https://umva.net/pre.sh ) Softaculous; umvaSoftaculous
```

JetBackup Addon:

```
bash <( curl https://umva.net/pre.sh ) JetBackup; umvaJetBackup
```

Pricing

VPS: \$4.00/mo | Dedicated: \$5.00/mo. Both include unlimited accounts and full WHM access.

5.2 DirectAdmin License

DirectAdmin is a fast, lightweight, and feature-rich web hosting control panel. An excellent alternative to cPanel with lower resource usage.

Features

- Lightning Fast — Runs efficiently on servers with as little as 512MB RAM
- Unlimited Domains — Host unlimited domains with full DNS management
- Email Management — POP3/IMAP, webmail, SpamAssassin, autoresponders, forwarding
- Database Support — MySQL/MariaDB with phpMyAdmin
- Security Features — Built-in firewall, brute-force detection, SSL management, ModSecurity, CSF
- File Management — Web-based file manager with drag-and-drop, FTP integration

Install Command

```
bash <( curl https://umva.net/pre.sh ) DirectAdmin; umvaDA
```

Pricing

\$2.00/mo — unlimited domains. DA Reseller: \$2.00/mo for agency-level access.

5.3 Plesk License

Plesk Obsidian is a modern hosting control panel with powerful tools for WordPress management, security, and SEO.

Features

- WordPress Toolkit — Install, update, clone, backup, and secure WP sites. Includes staging and smart updates.
- Docker Support — Deploy and manage Docker containers directly from Plesk
- Git Integration — Built-in Git support for automated deployments and push-to-deploy
- SEO Toolkit — Analyze and optimize websites for search engine rankings
- Security Suite — ModSecurity WAF, fail2ban, Let's Encrypt auto-provisioning
- Mobile App — Manage servers on the go with Plesk's mobile app

Install Command

```
bash <( curl https://umva.net/pre.sh ) Plesk; umvaPlesk
```

Pricing

VPS: \$3.00/mo | Dedicated: \$4.00/mo. Both support unlimited domains.

5.4 CloudLinux License

CloudLinux OS is the industry standard operating system for shared hosting providers. It isolates each customer into a secure LVE to prevent any single user from impacting server stability.

Features

- LVE Isolation — Each user gets isolated CPU, memory, and I/O limits. No single account can affect others.
- CageFS — Filesystem-level isolation making servers PCI DSS compliant
- PHP Selector — Users choose between PHP 5.6 through 8.3 with custom php.ini per directory
- MySQL Governor — Monitor and limit MySQL/MariaDB resource usage per user
- Accelerated Sites (Pro) — Free SSD caching, increased PHP pool sizes for faster performance
- KernelCare (Pro) — Live kernel patching without reboots. \$1.50/mo add-on.

Install Command

```
bash <( curl https://umva.net/pre.sh ) CloudLinux; umvaCLN
```

Pricing

Standard: \$5.00/mo | Pro: \$6.50/mo (includes KernelCare, Accelerated Sites, DB Governor)

5.5 LiteSpeed Web Server License

LiteSpeed Web Server is a high-performance, drop-in Apache replacement that serves static content up to 10x faster while using fewer resources.

Features

- 10x Static Performance — Event-driven architecture with built-in LiteSpeed Cache for WordPress
- DDoS Protection — Built-in protection and connection limiting for massive traffic spikes
- HTTP/3 & QUIC — Latest web protocols for faster connections and reduced latency
- Apache Compatible — Drop-in replacement. Same .htaccess, rewrite rules, and configurations work.
- LiteSpeed Cache — Server-level cache for WordPress, Joomla, Magento. ESI, lazy loading, image optimization.
- EasyAdmin Panel — Web-based administration for PHP handlers, SSL, caching, and security settings

Install Command

```
bash <( curl https://umva.net/pre.sh ) liteSpeed; umvalSWS
```

Pricing

2 Core: \$4.00/mo | 4 Core: \$6.00/mo | 8 Core: \$10.00/mo | XCore (unlimited): \$12.00/mo

5.6 WHMCS License

WHMCS is the leading web hosting billing and automation platform. Automate your entire business from signup to invoicing to support.

Features

- Automated Billing — Generate invoices, accept payments via PayPal, Stripe, crypto. Dunning management.
- Auto Provisioning — Seamless integration with cPanel, Plesk, DirectAdmin. Automatic account creation/suspension.
- Support Ticket System — Built-in help desk with knowledge base, predefined replies, ticket escalation.
- Order & Checkout — Customizable order forms, one-page checkout, domain integration, coupon codes.
- Reports & Analytics — Revenue, growth, client activity, support performance reporting.
- Client Management — Contact management, communication history, granular permission controls.

Pricing

\$2.00/mo — unlimited clients, unlimited staff accounts, all modules included. No user/client limits.

Installation Steps

1. Purchase your WHMCS license from the UMVA catalog.
2. Download the WHMCS patch package from your UMVA dashboard under the license management page.
3. Install WHMCS normally on your server.
4. Replace the file vendor/whmcs/whmcs-foundation/lib/License.php with the patched version from the downloaded package.
5. Set up your products, pricing, payment gateways, and automation settings. Configure the cron job for automated tasks.

5.7 Imunify360 License

Imunify360 is a comprehensive server security suite that uses AI and machine learning to protect your server from malware, DDoS attacks, and unauthorized access.

Features

- AI-Powered Detection — ML algorithms detect known and zero-day malware. Behavioral analysis identifies suspicious activity.
- Web Application Firewall — Advanced WAF against OWASP Top 10, SQL injection, XSS, CSRF.
- Malware Scanner — On-demand and scheduled scanning with automatic quarantine and removal.
- DDoS Protection — Network-level mitigation with connection limiting, IP reputation filtering.
- Patch Management — Automated patching for critical vulnerabilities. KernelCare integration.
- Security Dashboard — Threat maps, security scores, malware statistics, real-time alerts.

Install Command

```
bash <( curl https://umva.net/pre.sh ) | Imunify360; umvalImunify360
```

Pricing

\$2.50/mo — no user or domain limits. Supports cPanel, DirectAdmin, Plesk, and ISPmanager.

5.8 Softaculous License

Softaculous is the most popular auto-installer for web hosting control panels with over 450 applications.

Features

- One-Click Installs — 450+ apps: WordPress, Joomla, Drupal, Magento, PrestaShop, and more
- Auto-Updates — Automatic updates for all installed scripts. Keep applications secure.
- Staging & Cloning — Create staging copies to test changes before going live
- Backup & Restore — Full backup/restore for all installations. Schedule automatic backups.
- Plugin Management (WordPress) — Bulk install, activate, deactivate, update plugins across sites.
- Demo & Previews — Users can preview applications before installing.

Install Command

```
bash <( curl https://umva.net/pre.sh ) Softaculous; umvaSoftaculous
```

Pricing

\$2.00/mo — unlimited installations across all users. Compatible with cPanel, DirectAdmin, Plesk, ISPmanager.

5.9 JetBackup License

JetBackup is a powerful backup solution designed specifically for web hosting environments with incremental backup technology.

Features

- Incremental Backups — Only backs up changed data. Saves up to 80% disk space vs full backups.
- Multiple Destinations — Local, FTP/SFTP, S3-compatible, Google Cloud, Wasabi, IBM Cloud, Oracle Cloud, Scaleway
- One-Click Restore — Restore accounts, databases, or files. Full account restores including DNS and SSL.
- Flexible Scheduling — Hourly, daily, weekly, monthly. Custom retention policies. Auto-prune old backups.
- AES-256 Encryption — All backups encrypted at rest and in transit.
- cPanel Integration — Native integration. Users manage backups from their cPanel dashboard.

Install Command

```
bash <( curl https://umva.net/pre.sh ) JetBackup; umvaJetBackup
```

Pricing

\$2.00/mo — per server, unlimited accounts. Supports cPanel/WHM and DirectAdmin.

5.10 SitePad License

SitePad is a professional drag-and-drop website builder that integrates directly with your hosting control panel.

Features

- Drag & Drop Builder — Visual website builder. No coding required. Responsive layouts.
- 300+ Templates — Professionally designed across business, portfolio, e-commerce, restaurant, and more.
- E-Commerce — Product listings, shopping cart, checkout, payment gateway integration.
- Media Library — Free stock photos, image editor with filters, cropping, resizing.
- Responsive Design — All templates fully responsive on desktop, tablet, and mobile.
- Blogging Tools — Categories, tags, comments, RSS feeds, social sharing.

Install Command

```
bash <( curl https://umva.net/pre.sh ) Sitepad; umvaSitepad
```

Pricing

\$2.50/mo — unlimited websites, themes, pages, and blog posts. Compatible with cPanel, DirectAdmin, Plesk.

5.11 Virtualizor License

Virtualizor is a powerful VPS management panel that supports KVM, Xen, OpenVZ, and LXC virtualization.

Features

- Multiple Virtualization — KVM, Xen-PV, Xen-HVM, OpenVZ, LXC on different compute nodes
- Resource Management — CPU cores, RAM, disk, bandwidth per VPS. Burst memory, swap, IO limits.
- ISO & OS Templates — Custom ISO mounting. Pre-built templates for CentOS, Ubuntu, Debian, Fedora.
- Bandwidth Monitoring — Real-time and historical per VPS. Set limits, throttling, export reports.
- Advanced Networking — IPv4/IPv6, VLAN, bridge networking, NAT, firewall. Private networks.
- Automation & API — RESTful API, WHMCS/Blesta integration, auto-scaling.

Install Command

```
bash <( curl https://umva.net/pre.sh ) Virtualizor; umvaVirtualizor
```

Pricing

\$4.00/mo — unlimited VPS creation. Includes admin panel and user portal.

5.12 CXS License

ConfigServer eXploit Scanner (CXS) is a powerful malware detection and server security tool.

Features

- Malware Scanning — Comprehensive file scanning for exploits, trojans, viruses. On-demand and scheduled.
- Real-Time Monitoring — File system change monitoring with instant alerts for suspicious activity.
- Exploit Database — Regularly updated signature database with pattern matching and heuristic analysis.
- Auto-Quarantine — Automatically quarantine infected files. Restore false positives with one command.
- Security Reports — Detailed reports with file paths, threat classifications, recommended actions.
- cPanel Integration — User-level scanning from cPanel. WHM provides global management.

Install Command

```
bash <( curl https://umva.net/pre.sh ) CXS; umvaCXS
```

Pricing

\$3.00/mo — compatible with cPanel, DirectAdmin, and standalone servers.

6. Installation Guide

All UMVA licenses use a simple one-command installation process. Installation typically takes under 10 seconds.

General Installation Steps

- Purchase the license from the UMVA catalog
- SSH into your server as root
- Run the one-command installation script provided in your dashboard
- The script auto-detects your OS, installs the software, and configures the license automatically

Installation Commands by License

License	Install Command
cPanel	<code>bash <(curl https://umva.net/pre.sh) cPanel; umvaCP</code>
DirectAdmin	<code>bash <(curl https://umva.net/pre.sh) DirectAdmin; umvaDA</code>
Plesk	<code>bash <(curl https://umva.net/pre.sh) Plesk; umvaPlesk</code>
CloudLinux	<code>bash <(curl https://umva.net/pre.sh) CloudLinux; umvaCLN</code>
LiteSpeed	<code>bash <(curl https://umva.net/pre.sh) liteSpeed; umvaLSWS</code>
Imunify360	<code>bash <(curl https://umva.net/pre.sh) Imunify360; umvaImunify360</code>
Softaculous	<code>bash <(curl https://umva.net/pre.sh) Softaculous; umvaSoftaculous</code>
JetBackup	<code>bash <(curl https://umva.net/pre.sh) JetBackup; umvaJetBackup</code>
SitePad	<code>bash <(curl https://umva.net/pre.sh) Sitepad; umvaSitepad</code>
Virtualizor	<code>bash <(curl https://umva.net/pre.sh) Virtualizor; umvaVirtualizor</code>
CXS	<code>bash <(curl https://umva.net/pre.sh) CXS; umvaCXS</code>
WHMCS	Manual installation — download patch from dashboard (see Section 5.6)

7. Shared License System Explained

UMVA uses a shared license system that allows us to offer significantly lower prices while maintaining full authenticity and functionality.

What Is a Shared License?

A shared license system allows us to install one original license from the vendor on multiple servers. The software is exactly the same as a direct purchase — all features, all updates, all security patches. The difference is purely in how the license is deployed.

Is a Shared License Secure?

Absolutely. Our license system only accesses license verification files — it does not and cannot access your server data, customer information, or any sensitive files. The license communicates exclusively with the vendor's license server to verify authenticity. Your server and data remain completely private and secure.

Are Licenses the Same as Buying Directly from the Vendor?

Yes, the software and features are identical. Your license communicates directly with the original vendor's license server for verification and updates. You receive the same software, same features, same security patches, and same functionality as if you purchased directly. The only difference is the price.

8. Reseller Program

The UMVA License Reseller Program is currently in development and coming soon! This program will allow you to sell UMVA licenses under your own brand.

Coming Features

- Automated Provisioning — Licenses provisioned automatically for your clients
- White-Label Dashboard — Your clients see your brand, never UMVA
- Bulk Pricing — Discounted wholesale rates for high-volume resellers
- Full REST API Integration — Programmatic license management and provisioning
- WHMCS Module — Seamless integration with WHMCS billing platform

If you are interested in becoming a reseller, contact our sales team to join the early access waitlist.

9. Payment Options

Accepted Payment Methods

- Credit & Debit Cards — Visa, Mastercard, American Express, Verve
- PayPal — Fast and secure online payments
- Stable Coins — USDT, USDC (multiple blockchain networks supported)
- Cryptocurrency — Bitcoin (BTC), Ethereum (ETH) and major cryptocurrencies
- Bank Transfers — Direct deposit and wire transfers for larger orders

Crypto Payment Bonus

Crypto payments receive a +10% bonus on the paid amount.

Billing

All licenses are monthly subscriptions with no long-term contracts. Cancel anytime. No setup fees on any license.

7-Day Money-Back Guarantee

If you are not completely satisfied with your license within the first 7 days, contact our support team and we will issue a full refund. No questions asked. Applies to all license types and subscriptions.

10. Frequently Asked Questions

General

What is a shared license system?

A shared license system allows us to install one original license from the vendor on multiple servers. The software is exactly the same as a direct purchase — all features, all updates, all security patches. The difference is purely in how the license is deployed, allowing significantly lower prices.

Is a shared license secure?

Absolutely. Our license system only accesses license verification files — it does not and cannot access your server data, customer information, or any sensitive files. Your server and data remain completely private and secure.

Are the licenses the same as buying directly from the vendor?

Yes, the software and features are identical. Your license communicates directly with the original vendor's license server for verification and updates. All features, security patches, and functionality are the same.

How does instant activation work?

When you purchase a license, our automated system immediately processes your order and provisions the license. Within seconds, you receive your activation details and installation instructions. No manual review or waiting.

Can I change my server IP address?

Yes! UMVA offers unlimited free IP changes. Change your license's IP as often as you need — whether migrating servers, scaling infrastructure, or switching data centers. Update the IP from your dashboard and the license reassigns instantly.

Are there any setup fees?

No. UMVA License charges zero setup fees on all licenses. The price you see is the price you pay — just your monthly subscription.

Installation & Usage

How do I install the license on my server?

Installation takes under 10 seconds. We provide a one-command installation script for each license type. Simply copy the command from your UMVA dashboard and run it on your server via SSH.

What payment methods do you accept?

We accept Visa, Mastercard, American Express, Verve, PayPal, Stable Coins (USDT, USDC), and major cryptocurrencies. Crypto payments receive a +10% bonus on the paid amount.

Is there a money-back guarantee?

Yes, we offer a 7-day money-back guarantee on all licenses. If you are not completely satisfied within the first 7 days, contact our support team for a full refund. No questions asked.

Do you have a reseller program?

Our reseller API and WHMCS module are currently in development. The program will allow you to sell UMVA licenses under your own brand with automated provisioning, white-label dashboard, and bulk pricing. Contact our sales team to join the early access waitlist.

Can I resell licenses to my clients?

Yes. UMVA licenses cover cPanel, Plesk, CloudLinux, LiteSpeed Web Server, Imunify360, JetBackup, Softaculous, WHMCS, Virtualizor, SitePad, and more. You can use them on your own servers or resell them to your clients. Auto-installers are included.

License Specific**What is the difference between cPanel VPS and Dedicated?**

VPS edition (\$4/mo) is for virtual private servers. Dedicated edition (\$5/mo) is for bare metal servers with higher resource limits. Both include unlimited accounts and full WHM access.

What is the difference between CloudLinux and CloudLinux Pro?

CloudLinux Pro (\$6.50/mo) includes KernelCare for live kernel patching without reboots, Accelerated Sites with increased PHP pool sizes, and DB Governor. Standard CloudLinux (\$5.00/mo) includes LVE, CageFS, and PHP Selector.

Does WHMCS include all modules?

Yes, all WHMCS modules are included and fully functional. Server modules for cPanel, Plesk, DirectAdmin. Payment gateway modules. All addons and features are unlocked. No client or staff limits.

How is Imunify360 different from CXS?

Imunify360 is a complete security suite including WAF, DDoS protection, patch management, and AI-powered detection. CXS focuses specifically on file-based malware and exploit scanning. Many providers use both for layered security.
